To Whom It May Concern:

The homopolymer polyethylene, as supplied by us, is lawful for use in nonalcoholic, noncooking food contact applications included in existing food additive regulations with respect to food packaging materials published by the U.S. Food and Drug Administration at CFR 177.1520(C) (2.1). This material will withstand temperatures up to 150 degrees Fahrenheit.

You must make your own determination that your use of our product is safe, lawful, and technically suitable in your intended applications. Because of possible changes in the law and regulations, as well as possible changes in the products, we cannot guarantee that the status of this product will remain unchanged. We, therefore, recommend that customers continuing to use this product verify its status no less frequently than two years from the date of this communication.

Our bags do not contain latex or plasticizers.

No animal components are used in the manufacture of our bags.

Best Regards,

Clay Young
